Module Code & Module Title
Level 5 – Operating Systems

Assessment Type
Logbook 5
Semester
2024 Autumn

Student Name: Anshumala Bhandari

London Met ID: 23047472

College ID: NP01NT4A230149

Assignment Due Date: Thursday, December 5, 2024

Assignment Submission Date: Thursday, December 5, 2024

Submitted To: Sarika Dahal

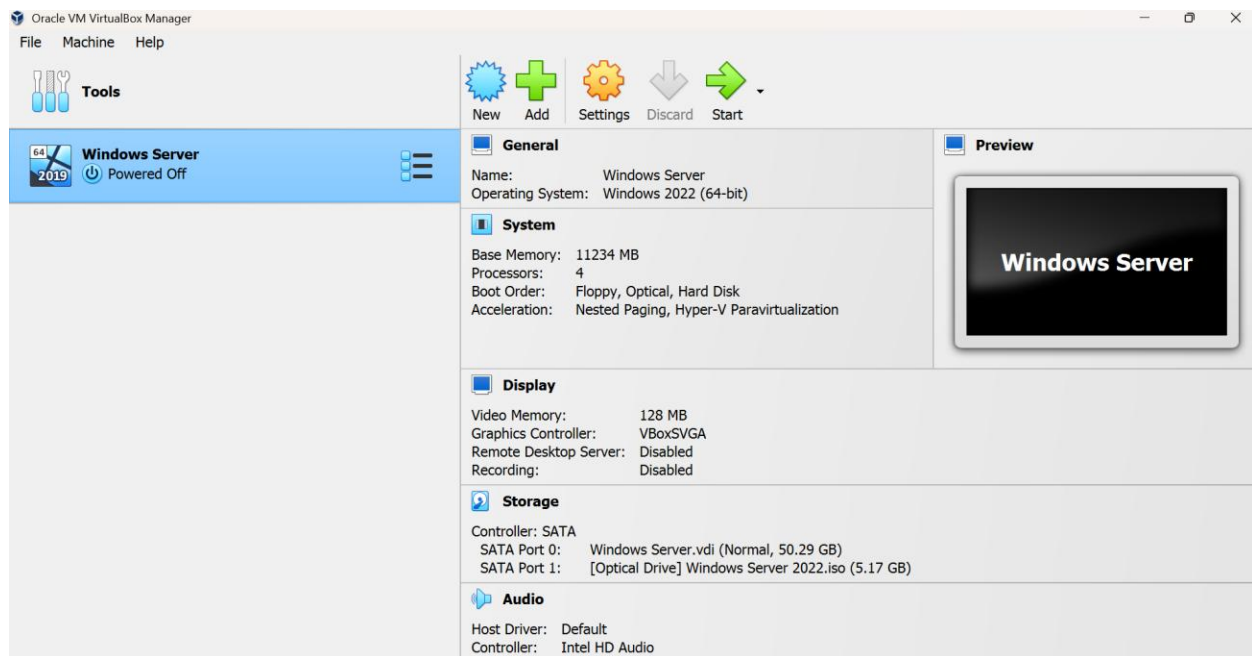

Word Count (Where Required):335

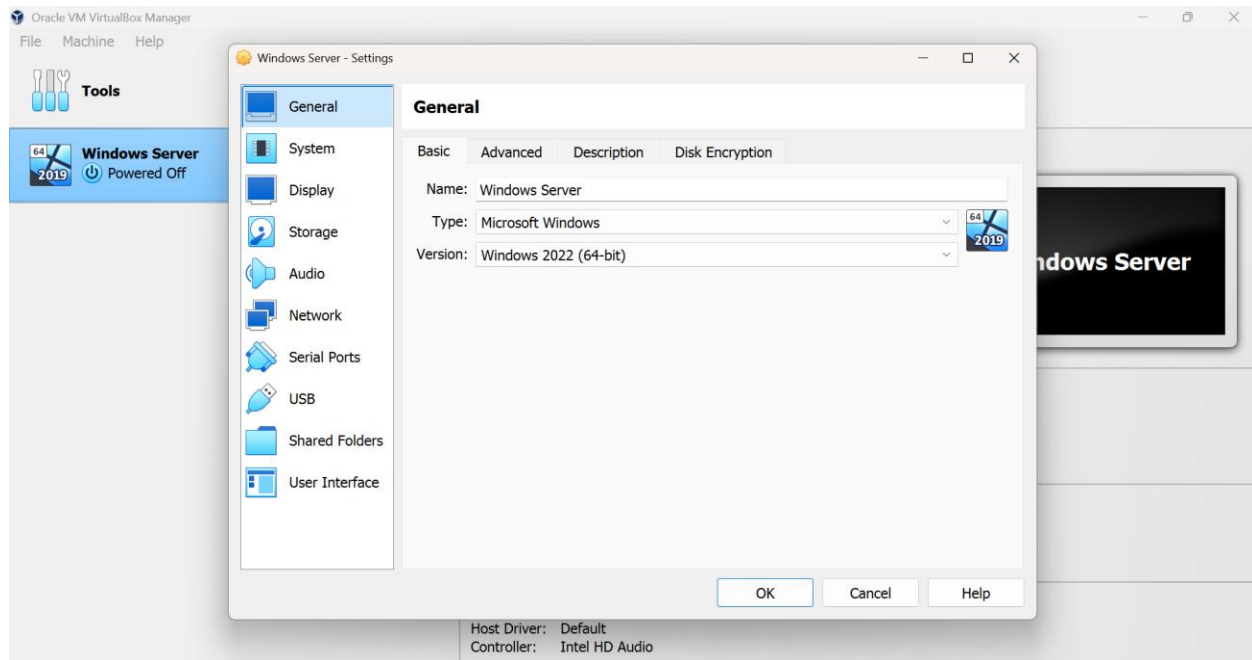

I confirm that I understand my coursework needs to be submitted online via MST Classroom under the relevant module page before the deadline in order for my assignment to be accepted and marked. I am fully aware that late submissions will be treated as non-submission and a mark of zero will be awarded.

Objective:

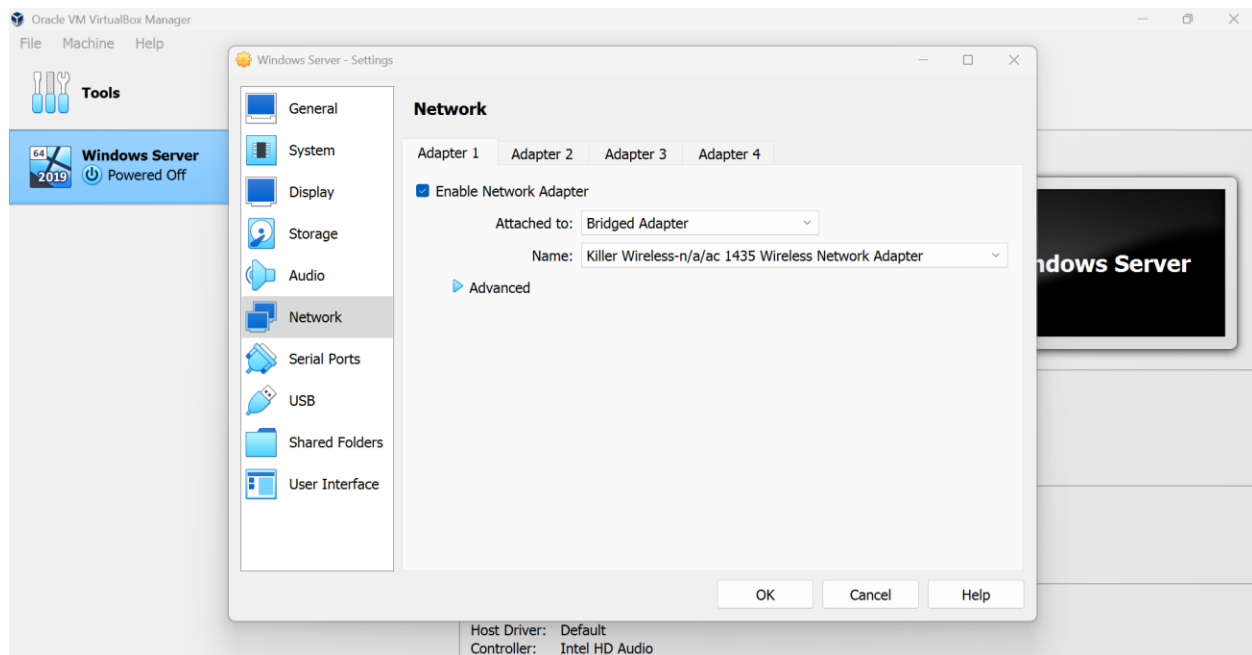

The main aim of this workshop is to host static websites on a Windows Server 2022 guest operating system and make them accessible from the host operating system and other devices within the same local network. Another goal is to enable the remote desktop feature on Windows Server 2022, allowing access to the guest operating system from the host OS.

Step 1: Open VirtualBox, select the virtual environment, and click on the "Settings" button.

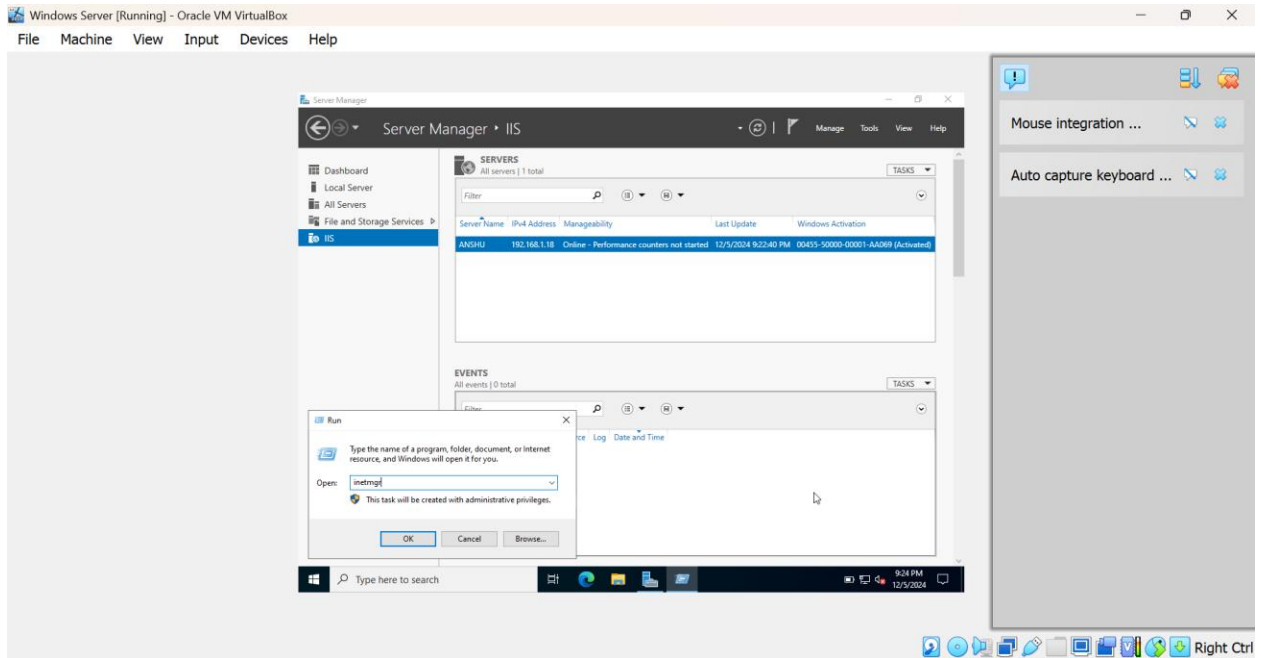

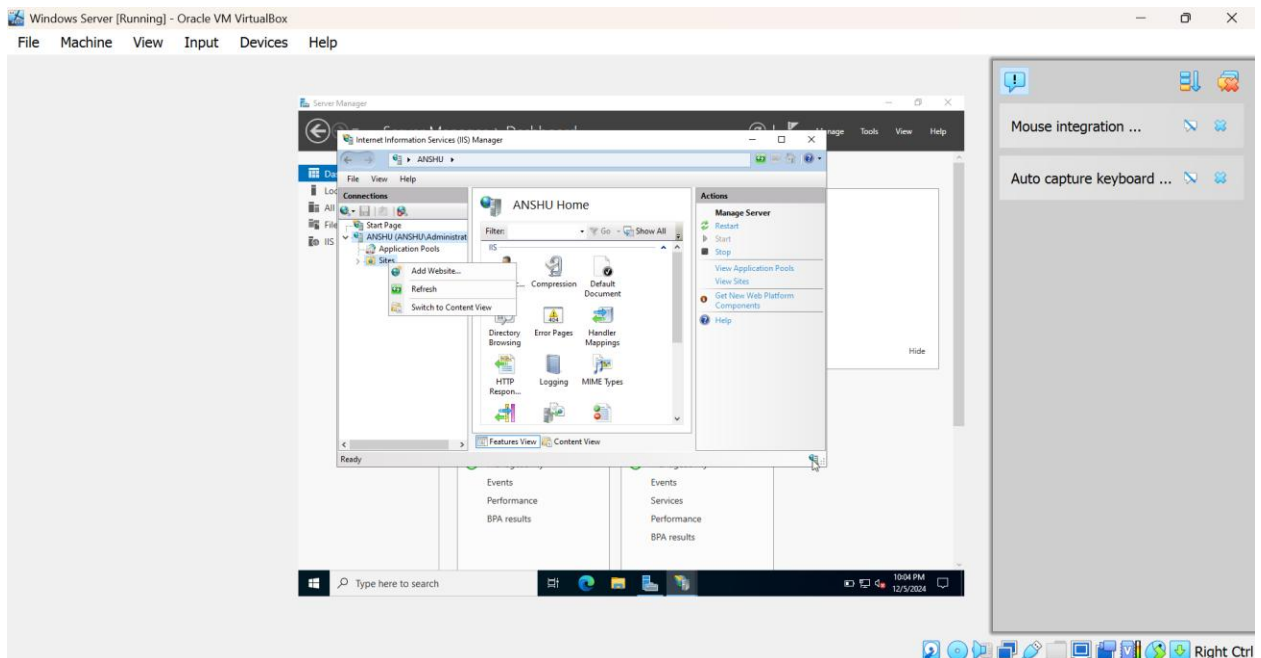

Step 2: go to the Network section, select Bridged Adapter under the "Attached to" option, and click OK. Start the Windows Server 2022 guest OS.

Step 3: Open the Run dialog, type inetmgr, and launch Internet Information Services (IIS) for hosting setup.

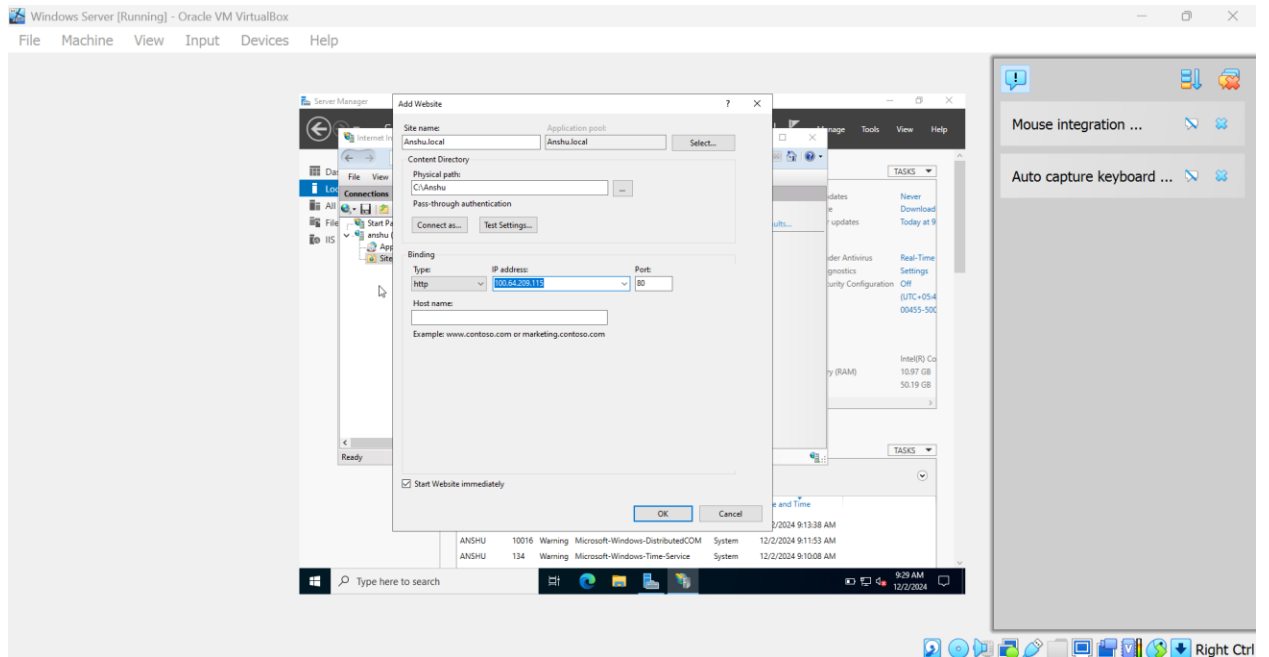

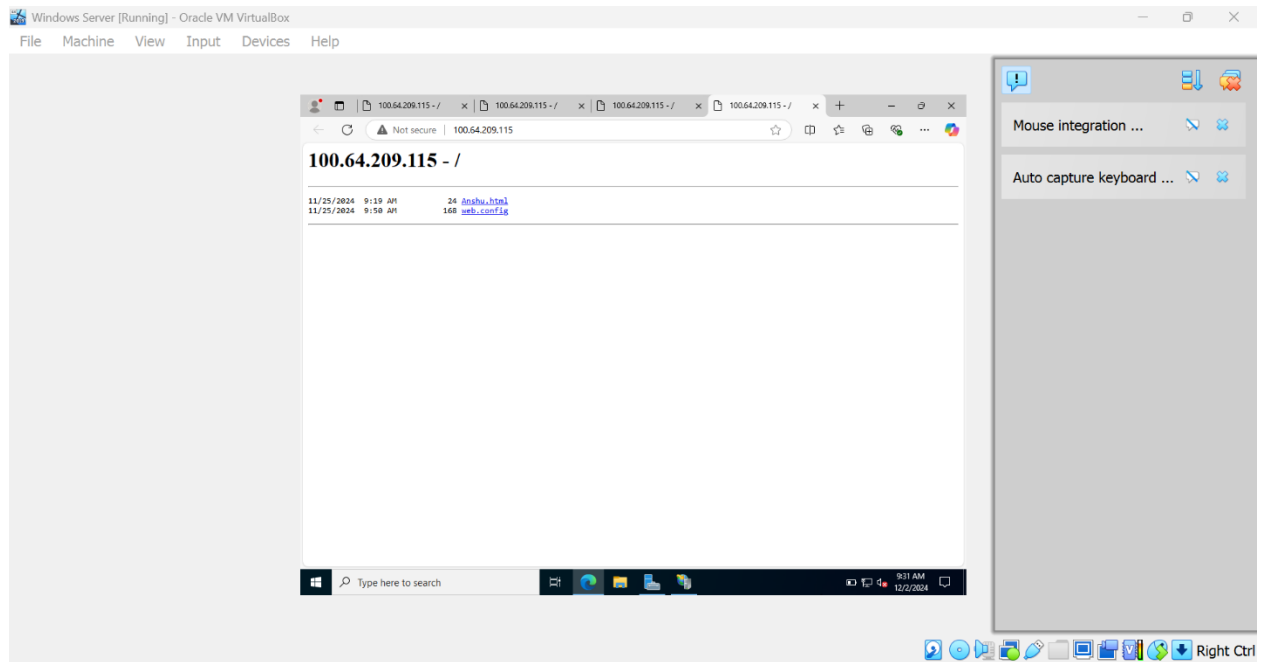

Step 4: Expand the server name, right-click on Sites, and select Add Website

Step 5: Fill in the website details:

- Provide a Site Name of your choice.
- Set the Physical Path to the folder containing your website files.
- Choose the available IP Address from the dropdown menu. Note that changing networks (e.g., home to college) will require updating the IP address.
- Leave other options as default and click OK.

Step 7: Download the VirtualBox Extension Pack

download.virtualbox.org

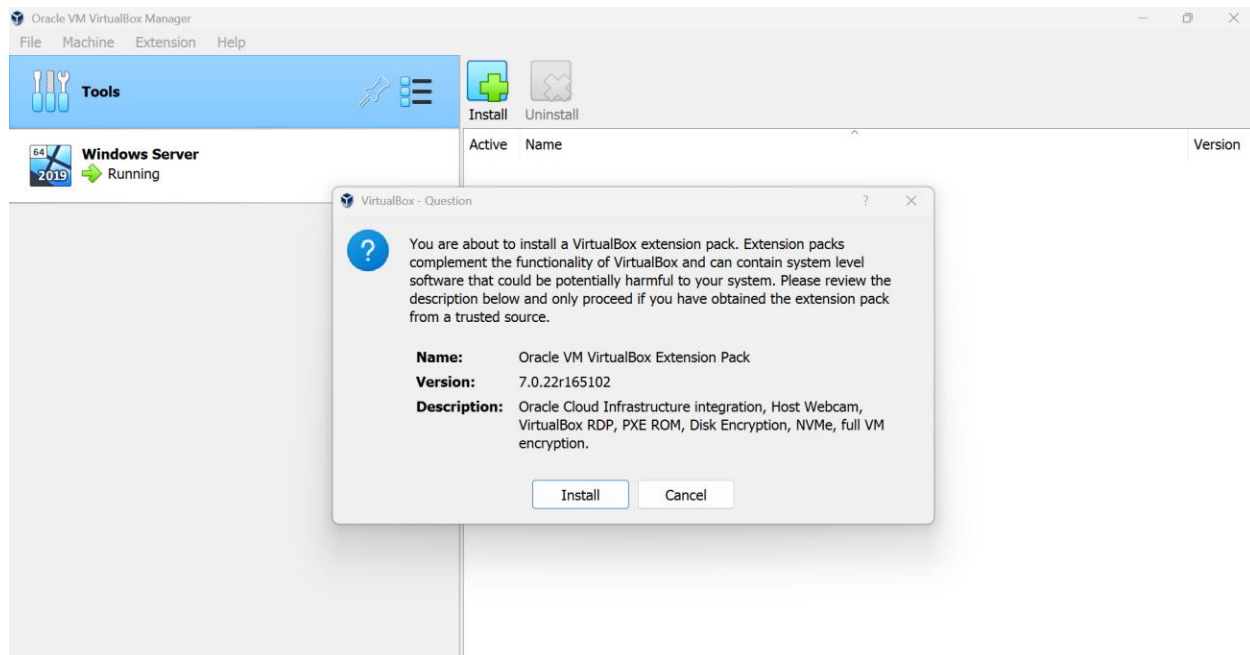

Step 8; Click on “Tools” After then, click on Preferences.

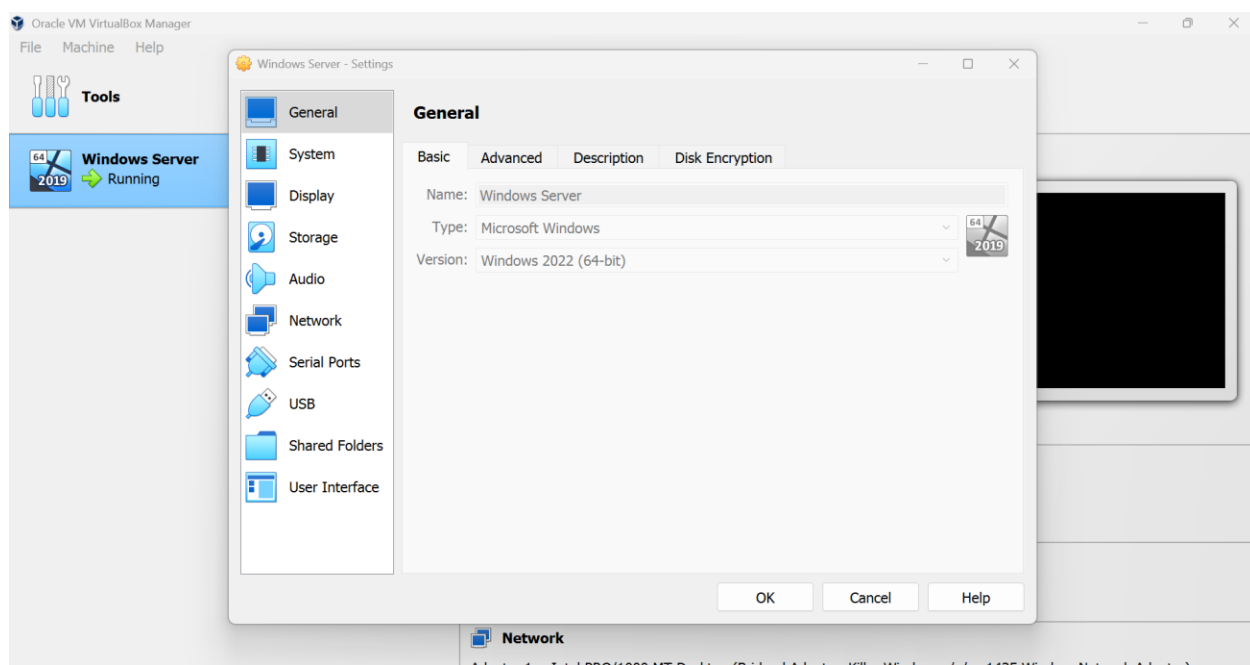

Step 9; Go to the extension pack file downloaded earlier and select that. After selecting that click on install

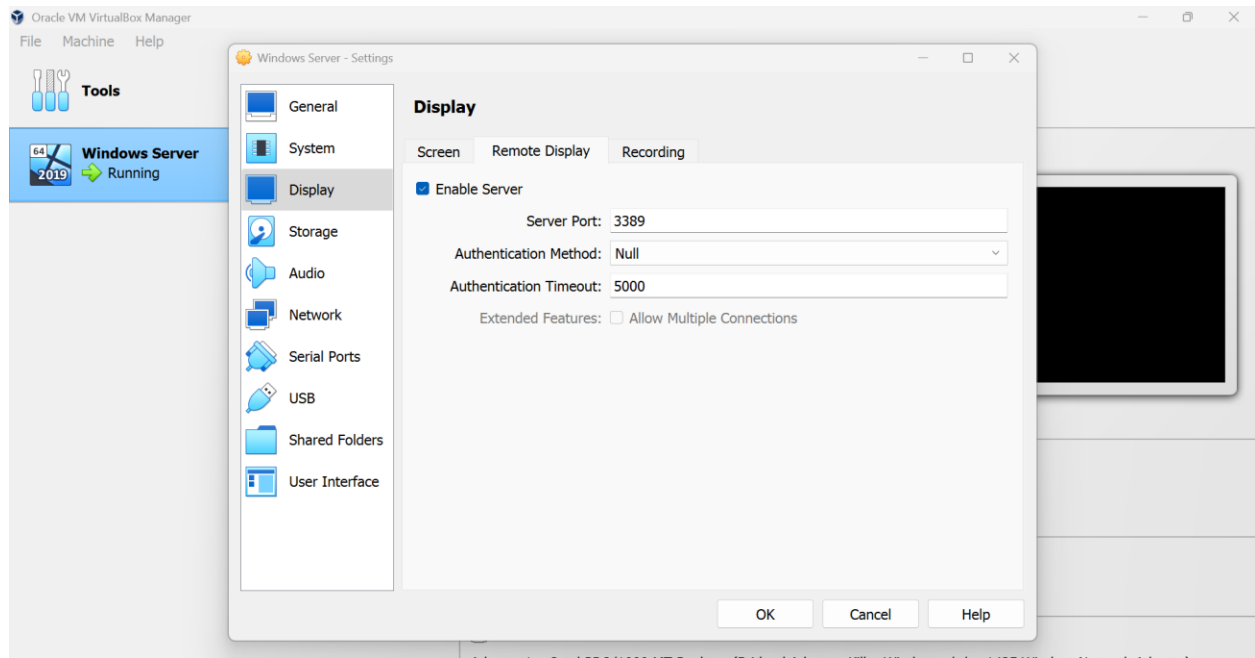

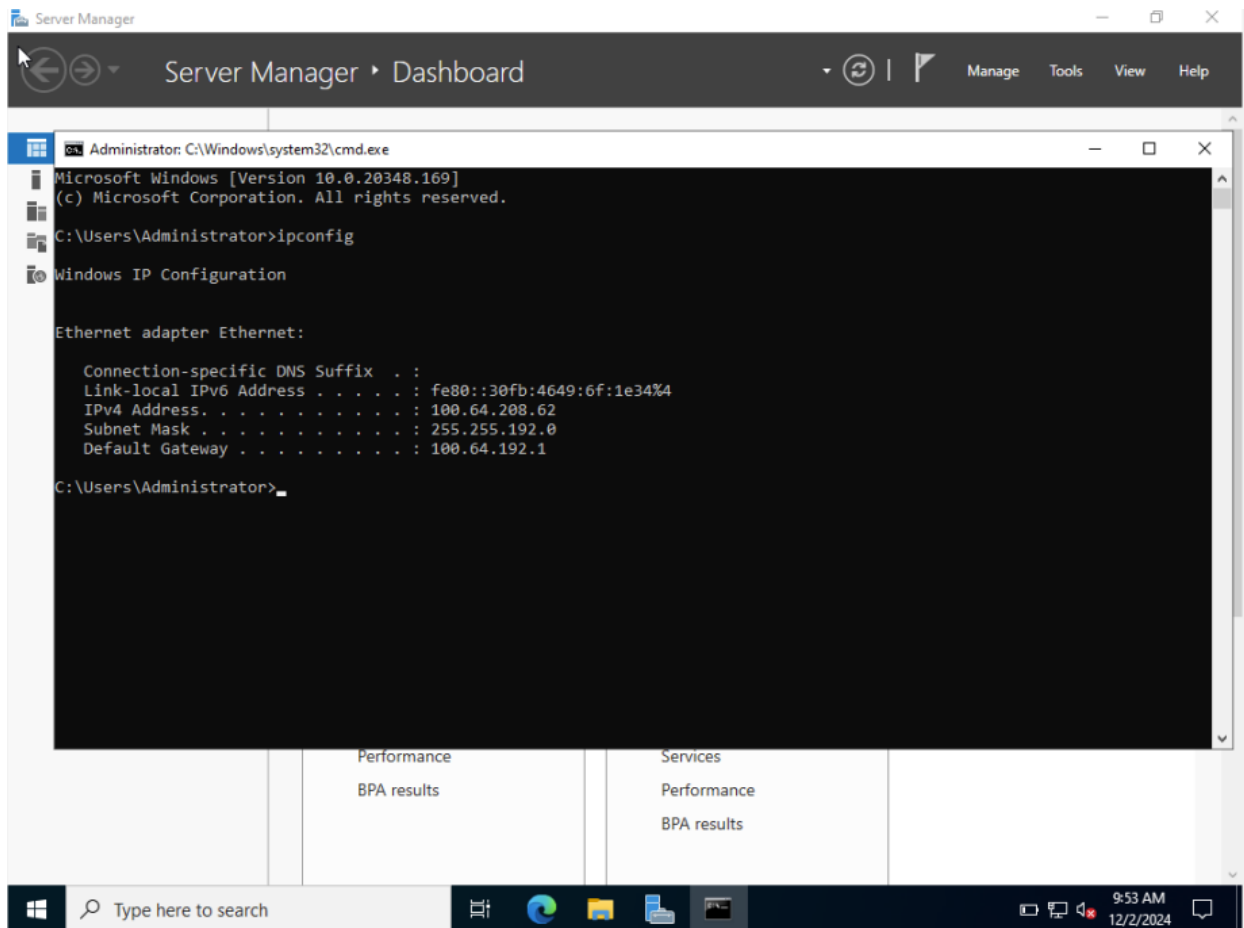

Step 10; Now close the tab and select the Server Virtual Environment and click on Settings.

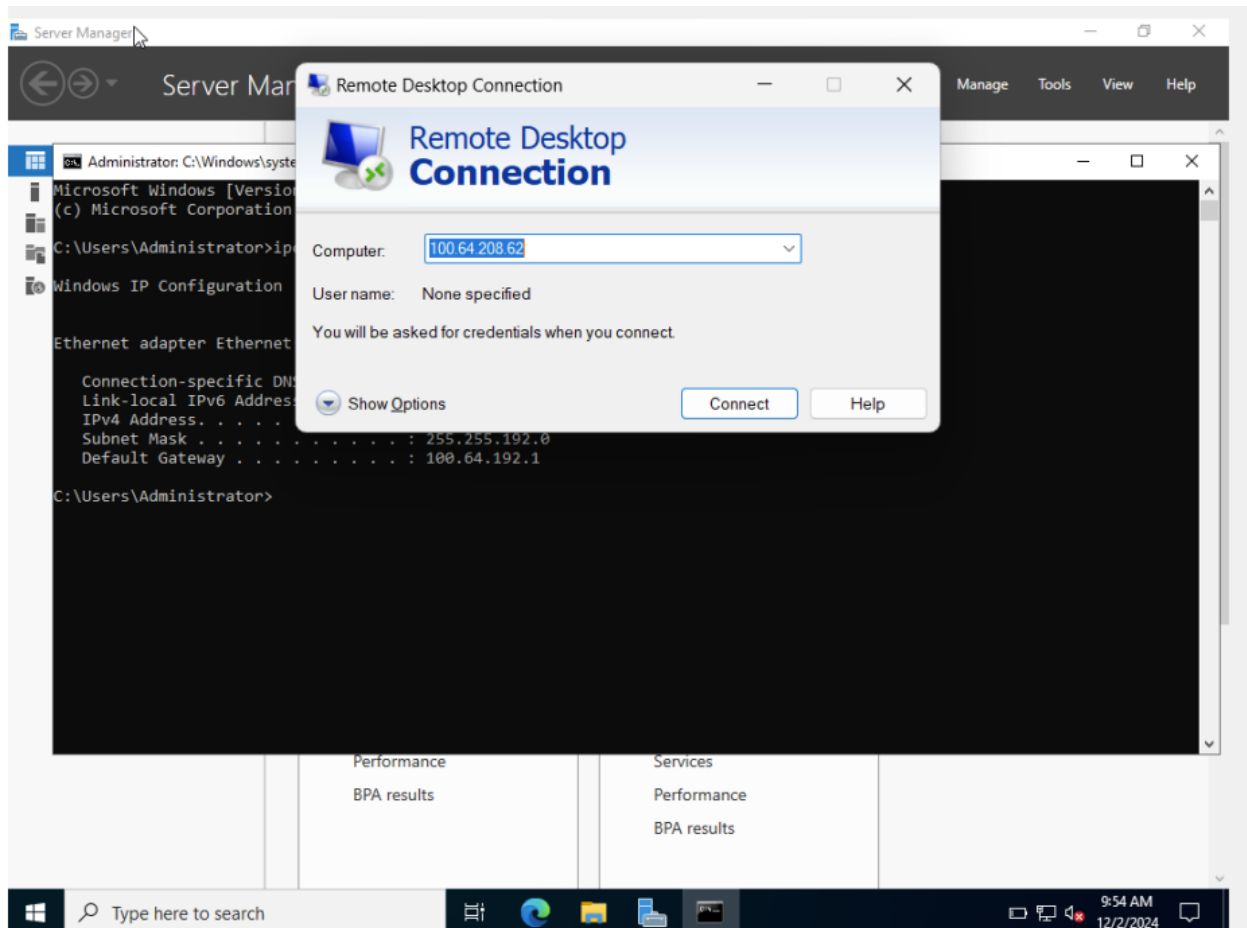

Step 11; Click on Display and click on Remote Display and click on Enable Server and click Ok.

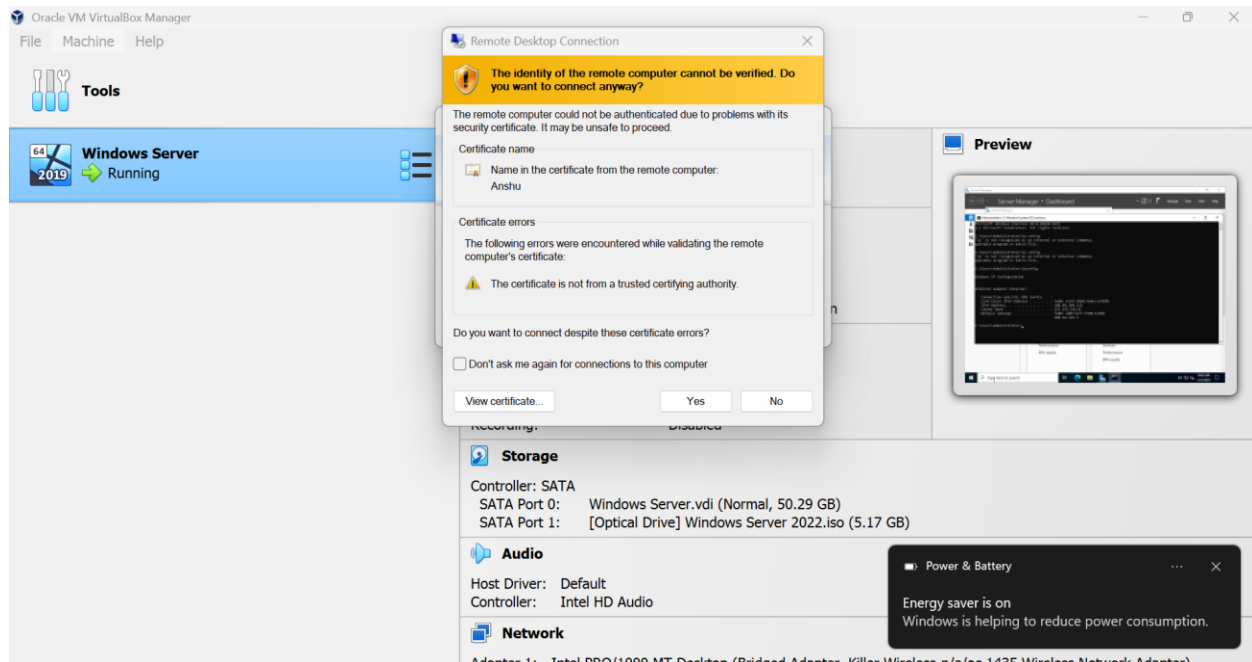

Step 12: Start the Windows Server 2022 guest OS and note its IP address.

Step 13: Open the Remote Desktop Connection tool on the host OS, enter the guest OS's IP address, and connect.

Step 14: You should now be able to access the guest OS remotely from the host OS.
